EXPERIENCE

Truein

Pune, India

Associate Software Engineer

Sep 2025 – Present

- Improved performance of latency-sensitive reporting and backend APIs through Redis-based caching and SQL query optimization, cutting p95 response times by over 80% and reducing server resource consumption.
- Led migration of critical product modules such as Leave, Reports, and Attendance, from a monolithic PHP codebase to NestJS-based microservices architecture, enhancing long-term scalability and reducing maintenance effort.
- Architected and maintained REST APIs powering attendance and workforce management flows, ensuring backward compatibility and stable performance across hundreds of enterprise tenants.
- Built integrations with external HR and payroll systems including QuickBooks, ClickHCM, and Splintly, enabling automated data sync across platforms.
- Resolved high-severity production incidents via root cause analysis, and hardened API security with JWT authentication and input validation to prevent SQL injection and unauthorized access.

Pattern Technologies

Pune, India

Software Development Intern

Jan 2025 – Jun 2025

- Engineered a reusable, accessible DatePicker component in Next.js and TypeScript, adopted across 10+ user-facing workflows and reducing frontend development time for dependent teams.
- Reduced frontend build times by 35% by replacing Webpack with Rsbld for faster and more efficient bundling, while automating deployment stages across the CI/CD pipeline.

Software Development Intern

May 2024 – Jul 2024

- Developed RESTful CRUD APIs and integrated them with a React-Redux and Saga frontend, improving data flow consistency and application responsiveness.
- Identified and resolved critical bugs during sprint cycles through systematic code reviews, contributing to a reduction in post-release defects.

PROJECTS

LogPulse – Real-Time Application Monitoring and Alerting Platform

NestJS, TypeScript, React.js, Redis, MySQL, BullMQ, AWS ECS, Socket.io, Jenkins, Prometheus

- Built a real-time application monitoring platform with a lightweight Node.js SDK that captures logs, API metrics, and errors, and streams them to a live dashboard via Socket.io for instant visibility.
- Designed an async log ingestion pipeline using BullMQ workers to process high-throughput event batches, storing structured data in Elasticsearch for sub-second full-text search across millions of log entries.
- Implemented a configurable alerting engine that evaluates metric thresholds (p95 latency, error rate) against Redis-aggregated data and triggers notifications via Slack webhooks and AWS SES email.
- Built a multi-tenant architecture with isolated Elasticsearch indices and API key-based authentication, supporting independent monitoring dashboards for multiple teams.
- Containerized all services (API, workers, alerting engine, frontend) with Docker and deployed on AWS ECS (Fargate) with a Jenkins CI/CD pipeline for automated image builds, ECR push, and zero-downtime deployments.

Estate Rental – Real Estate Listing Platform

MongoDB, Express.js, React.js, Node.js, Redis, WebSocket, Firebase, JWT

- Implemented Redis caching on search results to reduce database load and improve API response times.
- Built a full-stack property listing platform using the MERN stack with REST APIs, search and pagination.
- Added JWT, Firebase, and Google OAuth authentication with role-based access control for buyers and sellers.
- Integrated Socket.io real-time notifications to alert buyers when new properties match their saved search criteria.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, PHP, Java, C/C++, Python, HTML/CSS

Backend & Frameworks: NestJS, Node.js, Express.js, Next.js, React.js, Angular, Spring Boot, Socket.io

Databases & Caching: MySQL, PostgreSQL, MongoDB, Firebase, Redis, Elasticsearch

Cloud & DevOps: AWS (EC2, ECS, ECR), Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD Pipelines

Tools: Jest, Supertest, Git, Bitbucket, Postman, Swagger, VS Code

EDUCATION

College of Engineering, Pune (COEP)

Pune, India

Bachelor of Technology in Computer Engineering; CGPA: 8.39

Aug 2021 – Jun 2025
